LIFE RAFT SERIES

EAM
AVIATION

A LEGACY OF DEDICATION

EAM Worldwide was founded by Samuel Oroshnik, who was an aviation enthusiast since his teenage years. He took his passion for flying and turned it into a business to serve the unmet needs of the aviation industry. As a one-man shop, Oroshnik began by selling surplus safety equipment and later designed and built his own life rafts and vests by hand.

Today, EAM serves all OEM's, operators and lessors in the aviation and marine industries worldwide. Celebrating over 65 years as an industry leader, EAM continues to offer lightweight, innovative products which are customizable to meet clients' specific needs. Our dedicated team of specialized engineers continues to discover and design new applications in safety and survival technology year after year. EAM is also proud to support over 30 distribution centers and repair stations to ensure the optimal maintenance and performance of its products. EAM Worldwide proudly serves clients around the world with its headquarters in Miami, Florida and global sales office in Dubai, United Arab Emirates.

OUR PRODUCTS

This raft catalogue provides survival safety solutions for our commercial aviation clients. EAM's life raft series is self-inflating and intended for use by aircraft crew members and passengers during overwater emergencies. They are designed to provide safe, rapid and reliable means for aircraft egress in case of such an emergency. In addition to its standard packaging option, EAM is proud to offer customizable raft packaging to meet any client's specifications.

COMMERCIAL LIFE RAFT SERIES

Each product is manufactured with the highest quality craftsmanship and are proudly FAA-TSO approved. When deployed and in water, the raft may be boarded on either side. Raft accessories are contained in an accessories case tied to the raft. An accessories case is pulled into the raft by occupants subsequent to boarding. The fabric deck is equipped with an inflatable center float to provide additional flotation support. The center float is to be inflated by occupants using the hand pump supplied with the raft equipment. The raft canopy, located inside accessories case, features two (2) roll-up doors and a rain water collector in the top of the roof panel.

Please call our offices or visit eamworldwide.com for more detailed information.
